**Methodology**

On behalf of the Latino Community Foundation and the San Francisco Foundation, Latino Decisions surveyed 900 Latino adults between January 6-14, 2018. Interviews were collected via landline, cell phone, and web. The phone portion was conducted by live interviewers who were bilingual and administered the survey in language of preference of respondents. The online portion was conducted in a respondent self-administered format, and the survey and invitation was available to respondents in English or Spanish. The full data are weighted to match the Latino registered voter population in the 2016 Census ACS 1-year data file for age, gender, education, nativity, ancestry, and voter registration status. A post-stratification raking algorithm was used to balance each category to the ACS estimates. The survey carries a margin of error of +/- 3.3 percentage points.
