### **Methodology**

Latino Decisions interviewed 400 Latino voters and 400 Asian American voters participating in the Virginia 2013 general election. Voters were contacted by landline and cell phone between November 1- November 4. Latino respondents had the option to take the survey in English or Spanish and Asian American respondents had the option to take the survey in English, Korean, Mandarin, Tagalog, or Vietnamese, at their choosing. Initial sampling was based on Latinos and Asian Americans who had voted in the 2009 election, or newer registrants who voted in both the 2010 and 2012 general elections. To take the survey, respondents were asked if they had already voted early or by absentee ballot, or if not, if they were certain to vote in the Nov 5 election. Each ethnic group sample carries a margin of error of +/- 4.9%.
